REMARKS

The above error is believed to be the Office's error and that no fees are due in connection herewith.

Applicants had petitioned the Director to change the order of inventorship in their January 24, 2007 Petition, which was granted July 9, 2007 , and a copy of the Decision on the Petition is enclosed herewith.

An Application Data Sheet ("ADS") was submitted with said Petition at its time of filing, which updated the inventors' information. A corrected filing receipt was issued in the case dated 07/09/2007; however, the inventor's updated residence information was not included therein. The current request thus seeks to correct the order of inventors and the inventors' residence information to that shown in the July 9, 2007 Petition papers.

Thus, Applicants respectfully request that a Certificate of Correction be issued, to correct the order of inventorship on issued US Patent 7,307,191 as specified herein and on the enclosed form SB/44.

Thank you for your consideration.

Respectfully submitted,

Christopher J. Whewell

(57) **ABSTRACT**

This present invention provides materials for use as solid or concentrated chemical precursors for the production of organic peroxy acids (peracids). Organic peroxy acids are formed using a precursor according to the invention when they are combined with hydrogen peroxide or a hydrogen peroxide precursor such as a percarbonate or a perborate in aqueous medium. Organic peroxy acids, such as peroxyacetic acid, are used currently to disinfect medical equipment such as endoscopes and related items.
